December 11, 2024

Dear Resident,

This letter is to inform you that the City of Cleveland, Division of Water Pollution Control will undertake a project to provide an added level of protection against flooding on West 38 Street in the City of Cleveland. The **West 38 Street Sewer Project** is scheduled to commence the week of January 6, 2025. The project consists of replacing approximately 400 feet of sewer on West 38 Street from Woodbine Avenue to 400 feet north of Woodbine Avenue.

The City of Cleveland has contracted with Fabrizi Trucking and Paving, Inc. to perform this work. The City of Cleveland will work with the contractor and you to insure minimum inconvenience during the construction period. The contractor will install barricades within the limits of the construction area. The sewer excavation will take approximately 2 months to complete. The pavement will be restored in the trench area and the street will be resurfaced within the limits of work in the spring of 2025. We ask for your cooperation in observing all traffic regulations and following any detour signs.

The City of Cleveland will try its best to make this project a quick and safe one. Should you have any questions or concerns, please feel free to contact Project Manager Cecilia Mazzei at (216) 664-3779. Thank you for your cooperation in this important sewer project.

Project updates available at www.clevelandwpc.com, X, Facebook and Instagram.

Sincerely,

Ryan Lopez, Interim Commissioner
Division of Water Pollution Control
